GOLD MEDAL BULBS

AND PLANTS FOR FALL PLANTING

September 1st, 1932

OUR aim and purpose is, and has always been to handle only the very best merchandise. Our long established motto "Quality and Service" which we have striven to uphold at all times, has gained for us the confidence of a big majority of the flower loving public, not alone locally but throughout the whole Northwest.

In presenting our annual Catalog of BULBS AND PLANTS FOR FALL PLANTING we again want to state that every bulb and plant offered is of the highest grade and quality obtainable. Our knowledge of the sources of supply and our well known standard of quality enables us to command the very choicest stocks.

We offer many new varieties of tulips in the several types this year, but want to call especial attention to the Rock Garden types, of which we offer a number of most desirable kinds. These are listed under Botanical Tulips. While these are not new, they are scarce and some quite unique. Planting a few of these in the rock garden will prove a great pleasure and surprise to many.

Each year we hold exhibits at which we show nearly all the varieties of bulbs we offer in flower. In March we show at both our store and greenhouses a larger collection of these wonderful flowers than can be seen at any of the large flower shows. To those who attended the National Flower show at the Minneapolis Municipal Auditorium in 1930 we can state that we show more and newer kinds than were exhibited there and where we were awarded first premiums and medals in practically every class in which we entered. We welcome everyone to come and see this display of which we will announce the dates in due season.

We also show a colorful display of tulips at our nurseries, 1200 St. Clair St., during their blooming season in May. This is in the nature of a trial grounds. Our friends are invited to visit this exhibit and see the flowers under natural conditions.

PRICES ARE LOWER THAN EVER BEFORE

Because of the depressed business conditions all over the world, the price of bulbs has dropped lower than those prevailing last season, this despite the unfavorable growing conditions during the past year. This refers particularly to the choicer and more desirable kinds of tulips. Unless the import duty on bulbs is lowered by the U. S. Government we doubt that prices will ever be as low again.

QUALITY ALWAYS COUNTS

It should be kept in mind when buying bulbs that it is results that count most and that the best guarantee of satisfaction is to purchase from a reliable source. Our policy is, and always has been to supply our customers with the very best materials obtainable in every branch of our business. This is more essential with bulbs than with almost any other article, as it is most important that bulbs be properly handled, and by responsible experienced persons.

The Bulbs we offer are all selected **Top Size**, and the very best obtainable.

Service—A complete horticultural service is available to all our friends and customers at all times. This is made possible by our large organization of trained experts in the various departments of our business, who will cheerfully advise on any problem pertaining to floriculture and landscape gardening.

"Ideals"

A New Development in Tulips

IDEALS comprise a new class of Tulips developed through hybridization and resemble the Darwins from which they derive parentage in form. But they differ from Darwins in many respects, particularly in the improved and refined color tones, their early and robust flowering habits, while some are quite unique in form.

The most marked difference is in the new colorings, so much desired. In many of them the so-called Pastel colors and shades are outstanding and on the whole soft and light tones predominate including the creamy-white and snow-white which are so desirable for contrasts in the garden, differing from the intense and vivid colors of the true Darwins.

The size of the flowers average larger and their habit of growth is different in that the flowers are borne on more wiry stems which makes for a more graceful appearance.

Their lasting qualities both in the garden and after being cut is very marked "Ideal" tulips show a big superiority in this respect to most other kinds.

The average blooming period is somewhat earlier than the Darwins outdoors. In the greenhouse many of them will force as early as other early-flowering kinds, with the advantage of tall stems and more finely developed flowers.

The habit of growth is free and robust and when planted they should be given a liberal amount of fertilizer, preferably well rotted cattle manure. Bone meal or any standard concentrated fertilizer may be used, but mix this into the soil thoroughly so that the bulbs do not come into too close contact. Surprising results will be obtained if careful attention is given to this.

GRULLEMANNI TULIPS

THIS is a new race of tulips that has created a sensation among tulip growers in Holland. They are very distinct from all others in many respects. Most outstanding is their form and substance. The flowers are very large with long and pointed petals which reflex gracefully as the flower opens. The substance is remarkable, the blooms lasting for several weeks under any conditions.

They are different in their coloration from other tulips. The ground color varies white and cream to soft yellow. The large base or center is deep violet-blue or black with an outside zone of contrasting color. Each petal is feathered and veined in a deeper color through the center that leaves a broad band of the contrasting ground color. The inside shows a changing contrast with the outside as the flower opens on a tall, slender and graceful stem.

Grisilde—Inside of petals creamy white changing to yellow toward center. Outside white with red feathering through center of petals. Large greenish-black base. Large oblong flowers. Height 26". . . . Each **75c**; Doz **$7.50**

Mimoza-Grullemanni

Inga Hume—Inside deep yellow slightly sprayed with red, outside red with broad border of yellow. Large black base. Very strong erect stems. Height 24". . . . Each **75c**; Doz **$7.50**

Minerva—Inside white faintly sprayed red. Outside heavily feathered red with broad white edges. Large violet-blue base. Large globular flower Height 28". . . . Each **$1.00**; Doz. **$10.00**

Mimoza—Inside deep primrose yellow, outside light yellow with red feathering. Large intense black base with yellow border. Very large flower. (See illustration) Height 28". . . . Each **60c**; Doz **$6.00**

Nadya—Inside pure white with large black center, outside feathered red on pure white ground. Fine large flower on tall, graceful stem. Height 28". Each **$1.00**; Doz **$10.00**

Salome—Inside creamy white with large black center, outside blush white with carmine feathering. Large flower on sturdy stem. Height 27". . . . Each **$1.00**; Doz **$10.00**

Vivace—Inside primrose flaked with red, large black center. Outside light yellow heavily feathered rosy-red in center of petals. Large finely formed flower on strong stem Height 25". . . . Each **75c**; Doz **$7.50**

To introduce these fine and unusual tulips we will supply seven bulbs one of each of the above named kinds for **$4.50** post paid.

IDEAL TULIPS WILL GIVE EARLY COLOR TO THE GARDEN

Darwin Tulips

Afterglow

Jubilee

THE Darwins are now too well known to require any particular mention. They are the most popular of the many kinds for garden planting and are well deserving of their popularity as they comprise the most brilliantly colored class of all. There are new kinds and colors being added each year and there is now a very extensive range to choose from.

The list of Darwins offered on this page covers the whole range of colors and the very best kinds. All are of the greatest merit. The bulbs we offer are all "TOP SIZE" the kind that produce results. We do not, and will not handle the culls and inferior grades that are offered at sale prices.

Plant the bulbs as closely as desired, about six inches deep, and before the sharp frosts harden the ground. Before snow comes to stay, cover with leaves or straw. Remove this covering in the spring as soon as it is free from snow and ice.

Afterglow—Rosy pink edged with orange and salmon. A beautiful color combination and quite unique in Darwins. (See illustration). Height 26″....Doz. **70c**; 100 **$5.00**

DARWIN TULIPS WILL BLOOM FOR MANY YEARS FROM ONE PLANTING

Breeder Tulips

THEY are so called because in this type and class is comprised the old original or mother tulips that were favorites in Holland centuries ago, and from which many of the improved and newer types have been bred and developed.

They are very robust in habit of growth. Their size and great lasting qualities makes them unusually well suited for the garden.

There has been a great variation in development of the newer kinds, both in color and form, but the predominating color tones still remain rich bronze, buff, golden yellow and deep purples and overlaid with a silvery sheen or bloom, such as is seen on fruits. Many of them are sweet scented.

A longer time is required for the development of these strong-growing tulips, which makes their blooming season later than most kinds.

BREEDER TULIPS ARE PARTICULARLY FINE FOR BORDER PLANTINGS

Argo

Cottage and Hybrid Cottage Tulips

THE Cottage Tulips as a class comprise a greater variation in form and a larger range of color and shades than any other type. They vary in form from long slender flowers to oval and round. Many have long pointed petals that twist and reflex gracefully, resembling brilliantly colored lilies. They surpass other types in the richness of color. Many combinations of color and shades may be found among them.

The average flowering season for Cottage Tulips is later than for most other kinds. They are very hardy and robust, and the reason for their lateness is that it takes the large flowers longer to develop. During their development they are most interesting as in many varieties surprising changes of color takes place.

They are best suited of all tulips for the permanent garden or border. They have wonderful lasting qualities either in the garden or when cut.

Fantasy, Parrot Tulip

Various Tulips, Rare and Unusual Botanical or Wild Tulips

THESE are now becoming popular because of their adaptability for rock garden planting. They comprise the Wild or Native tulips which are found in the mountainous regions of Southern Europe and Asia Minor. They have not, except for a few kinds, been cultivated to any extent, most of them being collected in their native habitat. For this reason they are quite scarce and the supply limited.

We have secured through the largest collector and grower in Holland, a very choice collection of these tulips, and offer here the best varieties.

Batalini—A native tulip of Bokhara. Soft chrome yellow deepening toward center. Height 4" . . . Doz. **$2.00**; 100 **$15.00**

Clusiana—(The Lady Tulip) Small creamy white star shaped flowers, petals flamed cherry-red on outer side. (See illustration). Height 8" . . . Doz **70c**; 100 **$5.50**

Dasystemon—A rare tulip from Turkestan. Canary yellow with white lights. Showy star shaped flowers produced several on stem. Dwarf, early flowering. Height 6" . . . Doz. **$5.00**

Clusiana, See Botanical Tulips

Eichleri—Fiery scarlet with glistening black center marked with gold. A tremendous and brilliant tulip, native of Turkestan. (See illustration) Height 9". Doz **90c**; 100 **$7.00**

Forsteriana—A native tulip of Bokhara and the most brilliant of all tulip species. The flower is of enormous size and the color is intense vermillion-scarlet with gold and black center. This tulip is most outstanding and attractive. Height 20" Each **85c**; Doz **$9.00**

Forsteriana Hybrids—These are hybrids, the cross being Forsteriana and Early Tulip Brilliant Star. It resembles in form and brilliance its parent Forsteriana but not quite in size. The blooming time is ten days earlier. Height 18" . . . Doz. **$3.00**; 100 **$20.00**

Greigi—Brilliant orange-scarlet goblet shaped flower with pointed, slightly reflexing petals, the center marked with maroon and black zones. Foliage is marked and splashed with brown. Height 9" . . Doz. **$2.00**; 100 **$15.00**

Kaufmaniana—Large creamy flower, beautifully marked carmine, golden yellow center. The large flowers open up flat on stems varying in height from 6 to 12 inches. A very early flowering kind from Turkestan. Doz. **90c**; 100 **$7.00**

Marjoletti—Soft primrose, flushed carmine-rose at base. Small but most attractive flower, a native of Savoy. Height 12" . . . Doz. **70c**; 100 **$5.50**

Persica—Brilliant yellow inside, bronze on exterior, delightfully fragrant. Several flowers on branched stem, which is about 4" tall. Doz. **$3.50**; 100 **$25.00**

Sprengeri—Fiery orange-scarlet inside, outside suffused with shades of soft buff and orange. Large flower on graceful stem eighteen inches high. Very late flowering. Native of Armenia . . . Doz. **$2.50**; 100 **$17.50**

Sylvestris—Pure yellow medium sized flower on drooping stem. This is the sweet scented wild English tulip. Very fine for naturalizing in the rock garden where it will flower freely after the first year. . Doz **70c**; 100 **$5.50**

Tubergeniana—Brilliant vermillion with dark blotches at base. Flowers open to a width of 9 to 10 inches with reflexing petals. A most showy and rare flower. Height 10" . . . Each **$1.25**; Doz. **$13.00**

Turkistanica—Three and four small white flowers shaded yellow inside from each bulb. Very early flowering. Height 8". Doz. **$3.50**; 100 **$25.00**

Lord Carnavan, Triumph Tulip

PARROT OR DRAGON TULIPS

These curious flowers are very brilliant and unique. The very large flowers are fringed and laciniated in a most fantastic way. They should be planted in the border rather than in beds because of their twisting and curling habit of growth.

Cramoise Brilliant—Large, crimson and scarlet flowers. Doz. **60c**; 100 **$4.00**

Fantasy—Beautiful rosy-salmon, with straight, upright stem. Unlike most other Parrot tulips in this respect. This tulip is very desirable, very large flower on strong stem. (See illustration) . . . . Doz **$1.50**; 100 **$11.00**

Gemma—White with a flush of soft rose pink. Dwarf in growth but a large flower on stiff stem. . . . . Doz. **$1.00**; 100 **$7.50**

Leonard Sutton—Large, beautifully laciniated rose pink flower on strong, erect stem. This is a new and much improved kind, very scarce. Doz. **$3.00**; 100 **$22.50**

Lutea Major—Lemon yellow with deeper stripes . . Doz. **60c**; 100 **$4.00**

Perfecta—Red and yellow with striped shadings. . . . . Doz. **60c**; 100 **$4.00**

Sundew—This tulip is a sport of Darwin tulip Bartigon but we list it with the Parrots as the edges of the petals are crested prettily with a fine hairy formation. Large, deep scarlet-crimson flowers. . . . . Doz. **$1.00**; 100 **$7.50**

Parrot Tulip Mixture—Many fine kinds. . . . . Doz. **45c**; 100 **$3.50**

Note—Add 5c per dozen for tulips if to be sent by parcel post.

CLUSTER FLOWERED TULIPS

A distinct new type in tulips. Instead of the usual single flower on a stem these develop a cluster of four, five and six good sized flowers which are all in bloom at same time.

Monsieur Mottet—Ivory white flowers. Height 20" Doz **90c**; 100 **$7.00**

Madame Mottet—Rosy purple flowers. Height 22" Doz **$1.25**; 100 **$9.00**

REMBRANDT TULIPS

These are like Darwins in size and form, and from which they originate. The flower is blotched and striped irregularly and rarely will two flowers be alike in coloration. They have been named Rembrandts for the reason that they resemble the tulips seen in old Dutch paintings. Well mixed in many unique colors. . . . . Doz. **80c**; 100 **$6.00**

BIZARD AND BI-BLOOM OR OLD DUTCH TULIPS

These originate from the crossing of different Breeder Tulips, which results in feathered and flamed markings. They present many beautifully marked flowers in most unusual colors. The flowers are of medium size on stiff stems averaging eighteen to twenty-two inches tall.

Bizards—Feathered and flamed brown shades on yellow ground . . . . Doz. **70c**; 100 **$5.00**

Rose Bi-Blooms—Feathered and flamed rose on white ground . . Doz **70c**; 100 **$5.00**

Violet Bi-Blooms—Feathered and flamed violet and purple on white ground . . Doz. **70c**; 100 **$5.00**

Note—Add 5c per doz. for Tulips if to be sent by parcel post.

TRIUMPH TULIPS

Triumphs are the result of the successful crossing of the Early flowering tulips with Darwins. They are very robust in habit of growth, with very strong sturdy stems. The flowers are large and have wonderful keeping qualities. The average height is fifteen to eighteen inches, and most kinds will bloom from a week to ten days earlier than Darwins. They are still quite scarce.

We list a few of the best kinds that we can recommend.

Astoria—Creamy white with broad edge of cherry-rose . . . . Doz **$1.00**; 100 **$7.50**

Athene—Soft old rose with violet sheen. A beautiful large flower. This is a Mendel tulip but we include it under this heading. . Doz **$1.00**; 100 **$7.50**

Buffalo—Dull mauve, inside bright purple. . . . Doz. **90c**; 100 **$7.00**

Georgia—Royal purple, bordered carmine red . . . Doz. **$1.00**; 100 **$7.50**

Hindenberg—This is an outstanding tulip. Deep, brilliant crimson scarlet, bordered with a broad band of white. Very large flower . . . Doz **$2.00**; 100 **$15.00**

Hugo Stinnes—Deep cochineal red, deep yellow center. Large well formed flower. . . . . Doz **$1.00**; 100 **$7.50**

Lord Carnavan—Beautiful large, finely formed flower on strong stem. Rose pink with edges of petals white and lightly feathered white. (See illustration) Doz. **90c**; 100 **$7.00**

Professor Tendelo—Deep amaranth red flushed violet with broad band of yellow on edges, bluish white base. Very strong, robust stem. Doz **$1.00**; 100 **$7.50**

A VARIETY OF TULIPS ADD ATTRACTIVENESS TO THE GARDEN

General DeWet

Planting Tulips

WHILE tulips may be planted in most any soil, and under most any condition will produce flowers, it is only reasonable that planting them properly will insure better results. Proper planting is quite simple. Spade the soil to a depth of ten to twelve inches, and if you have a good garden soil it is not necessary to add fertilizer. But if extra sized flowers are desired, a fertilizer, preferably old, well rotted barnyard manure, or lacking this any standard commercial fertilizer, worked into the soil below the planting level will give surprising results. The fertilizer should be worked into the soil just below the bulbs, and it is safer not to allow the bulbs to get into direct contact with it. A scant inch of soil separating the bulb from the fertilizer is about right, as the roots will penetrate this quickly, and get the added nourishment at just the proper time.

Plant all the later flowering tulips about six inches deep, this will produce stronger and sturdier plants. They may be planted very closely, depending upon the effect desired. In beds for mass effect six inches apart is about right. Firm the soil about the bulbs well and give them a thorough watering.

Cover the planting with leaves or coarse straw before severe cold weather sets in, remove this as soon as snow and ice will allow in the spring. When uncovering if it is found that the bulbs have sprouted too much it will be best to scatter some of the covering over the sprouts loosely, so as to allow the air to circulate about them, but shading them from the sun, for a few days.

We advise leaving tulips in the ground when a permanent planting is desired, but when it is necessary to remove them, wait to do so as long as possible before lifting so as to allow them to ripen up. Lift them with the stem that remains and lay them in a cool, airy place. After stems have withered and dried they may be removed and the bulbs stored in a cool place until it is time to plant again.

Kaiserkroon

Indoor Culture—Plant six or more bulbs in a pot, using good soil, set away in a dark cool place, a good vegetable cellar is ideal. This is the root growing period and they should remain here until they have made a mat of roots at sides and bottom. This can be determined by tipping and lifting the pot away from the soil. It will take eight weeks or more to get this root action, and it is advisable not to be in too much of a hurry to bring them into the light.

TULIP COLLECTIONS

We use only TOP SIZE bulbs in these collections, the same as we offer under named varieties, and while we endeavor to make each one just alike, we find that some varieties in our general list do not sell as readily as others due to price, etc., and in order to equalize our stocks we often include some of the choicest and higher priced kinds in these collections. Every collection contains a large range of color and variety, with extra value, and we feel confident will please the most exacting.

DARWIN TULIP COLLECTIONS

These are the most popular of our collections. This year we are enabled, because of lower cost of most of the choicest varieties, to include many of them. Purchasers are assured of getting a very fine selection and exceptional value.

ALL OUR TULIP BULBS ARE THE LARGEST AND BEST GROWN IN HOLLAND

Narcissi

Eagle

NARCISSI comprise a large family of bulbous plants and vary greatly in form. There are now many distinct branches, mainly brought about through hybridization, which show a larger degree of improvement and progress than any other genera of plants.

Confusion often arises about the proper names when referring to the different types. Narcissi is the family name for Daffodils, Jonquils, Bi-Colors, Poetaz and many other commonly used terms. The large yellow trumpet varieties are generally regarded as Daffodils, the small cupped kinds are commonly termed Jonquils, and the white flowered are referred to as Narcissus without any further distinction.

Narcissi prefer a partially sheltered location, when best results will be obtained. They will, however, thrive in most any reasonable situation, continuing to increase from year to year.

Narcissi may be grown and bloomed indoors quite successfully, treating them the same as Hyacinths and Tulips, but should be given more time for root development before being brought into the light. The proper time for this is when a considerable network of roots show through when tipped out of pot.

DIFFERENT TYPES OF NARCISSI

Barri—The cup or crown measures less than one-third the length of the perianth segments or petals.

Campernils—Smaller flowers in clusters of three to six.

Incomparabilis—Cup or crown measuring one-third to nearly equal the length of the perianth segments.

Leedsi—Comprises all the low or short cupped crowns with white or silvery perianth, the crown white or slightly colored.

Poetaz—Flowers resulting from crosses between the Poeticus and Polyanthus Narcissus. Flowers in clusters, perianth petals fleshy.

Poeticus—Snowy white perianth with bright, short flattened crown or eye.

Trumpet—Trumpet or crown as long or longer than the perianth.

PLANT NARCISSI EARLY

Hyacinths

GROWING Hyacinths is a very simple matter indeed, and a great deal of pleasure may be derived from watching the development of the bright, cheery, sweetly scented flowers during winter days. No other bulb flower is easier to grow indoors.

Indoor Culture—For planting in soil use any kind of a pot that has drainage, ordinary clay pots are preferable and ordinary soil with a little sand mixed into it to make it more porous. Place a broken piece of crock over the hole in the bottom so as to insure free drainage. Fill in enough soil so that in placing the bulb the top will be about an inch below the level of the top of the pot, fill in soil and cover bulb firmly, leaving plenty of space below rim for watering. Use 4 or 5 inch pots for the larger bulbs when planting them singly. A number of the smaller bulbs planted in wider shallow pots is very satisfactory. After potting water thoroughly and place in a cool, dark place (preferably a vegetable cellar) and leave until a number of roots show on outside of soil when it is tipped out of pot. when several roots show through, it is then safe to bring them into the light where they are to grow.

Hyacinths may also be grown in glasses or bowls of water. The bulb should be placed so that bottom just touches the water, and enough water added occasionally to keep it at the proper level. Hyacinths grown in water should also be kept cool and dark until plenty of roots have developed.

Better results are obtained by growing them cool, a window sill or sunparlor is best.

Outdoor Culture—Plant Hyacinths so that top of bulb is about five inches under the surface, water thoroughly, and cover with leaves or coarse straw before severe cold weather sets in. Covering for Hyacinths should be quite heavy.

FRENCH ROMAN HYACINTHS

Beautiful, pure white flowers. Largest bulbs **15c** each, **$1.50** per dozen. Parcel post prepaid **10c** per dozen extra.

Dutch Hyacinths

UNNAMED HYACINTHS IN SEPARATE COLORS

These are Hyacinths grown under color name only, which saves the time and labor required for keeping named kinds separated, and enables us to offer fine bulbs at a minimum cost to customers who do not care about named varieties.

We can supply these in separate colors as follows: **Red and Rose shades, Pink shades, Blue shades, White, Yellow.** Price **10c** each, **$1.00** per dozen, **$7.00** per 100. Add **15c** per dozen if to be sent by parcel post prepaid.

BEDDING HYACINTHS IN SEPARATE COLORS

These are very good for garden planting. They will produce fine, large trusses of flowers.

Red, Pink, Dark Blue, Light Blue, White. 85c per dozen, **$6.00** per 100. Add **15c** per dozen if to be sent by parcel post prepaid.

POLYANTHUS NARCISSI

These are best suited to indoor culture and are very satisfactorily grown in soil, or may be grown in bowls or dishes of water. When planted outdoors they require heavy covering.

The bulbs we offer are the very largest selected size, and will produce more than double the number of flowers of the common size.

Chinese Sacred Lily—While this is termed a lily, it belongs strictly to the Narcissus family.

These bulbs may be planted in soil, but are preferably grown in bowls or dishes of water with pebbles to firm and hold them upright. Large bulbs send up from four to eight flower stems, producing large clusters of waxy, fragrant flowers.

Largest bulbs **15c** each, 3 for **40c; $1.50** per dozen. Add **3c** each or **20c** per dozen if to be sent by parcel post.

Grand Soliel D'or—Large clusters of deep golden yellow flowers, strongly fragrant. This flower resembles the Chinese Lily except in color.

Large bulbs **25c** each, 3 for **70c; $2.50** per dozen. Add **3c** each or **20c** per dozen if to be sent by parcel post.

Paper White—The French Narcissus (see illustration) Pure paper white flowers with small bright yellow centers. Very free flowering. Most desirable for growing in bowls or dishes of water and pebbles.

Largest bulbs **10c** each, 3 for **25c; 90c** per dozen. Add **10c** per dozen if to be sent by parcel post.

Paper White Narcissi

FREESIAS

These dainty, spicy, sweet-scented blossoms can easily be had in bloom at Christmas if planted early. They are only suited for pot culture as they are not hardy. Plant a number of bulbs to the pot and keep in a cool place such as a vegetable cellar until the roots show through the soil when tipped out of pot. After bringing into light they should be kept in as low a temperature as possible to get best results.

Purity—Pure white flowers. Giant bulbs **60c** per dozen. Large bulbs **45c** per dozen.

Elder's Giant White—A most sensational new kind, flowers are more than double as large as any other kind. Largest bulbs **10c** each, **$1.00** per dozen.

General Pershing—Lavender pink with yellow throat. Large bulbs **60c** per dozen.

Golden Daffodil—Beautiful, large golden yellow flowers. Largest bulbs **90c** per dozen.

Dorothy Scheepers—Bright rose pink. Largest bulbs **90c** per dozen.

Susanne Miller—Beautiful clear lavender blue flowers. Largest bulbs **90c** per dozen.

Rainbow Mixture of Freesias—Yellow, blue, pink and lavender shades mixed. **60c** per dozen.

Add **5c** per dozen for Freesias if to be sent by parcel post.

Crocus

THESE bright, cheerful flowers are the earliest of all to greet us in the spring. They are often in bloom before the snow is all gone, a few dotted about in clusters is a most pleasing sight. The colors in bright golden yellows, shades of blues, blue striped and pure white with golden yellow stamens. Plant them anywhere, but do not plant too deep, two inches and not to exceed four inches is about right.

They may also be grown indoors. Plant a number of bulbs in the pot, water thoroughly and set away in a dark, cool place. They may be brought into the light as soon as a number of roots show through the soil, not before. Early February is usually the right time. The flowers come quickly, often in seven or eight days.

Crocus are not always successfully grown unless the largest bulbs are used. The bulbs we offer are the very largest procurable and are sure to give satisfaction.

Crocus

Colchicum

Autumn Flowering Crocus

THE flowers of these curious plants do not appear until after their foliage has died down in late summer. The bulbs should be planted in the rockery or places where their growth during the spring and early summer months will not be disturbed. The growth stops during July or early August when the leaves die down, and the fine large flowers appear in September and continue to bloom long after other flowers have been cut down by frost and severe weather. These bulbs will bloom anywhere without soil or moisture. If laid on a table or window sill where light reaches them they will burst into bloom in a few days. We offer the largest bulbs of the three best sorts.

Autumnale—Large, deep lavender flowers. Giant bulbs **35c** each, **$3.50** per dozen.

Speciosus—Bright blue flowers. These may be planted in fibre or soil, need not be kept dark. They will bloom in about ten days either in livingroom or conservatory. **5c** each, **50c** per dozen.

Zonatus—Large rosy-lavender flowers. Blooms without water or soil. Very free flowering. **10c** each, **$1.00** per dozen.

"Grape Hyacinths" Muscari

MISCELLANEOUS BULBS

A FEW of these interesting but little known flowers will add greatly to the enjoyment of the garden in early spring. All of those listed here for planting outdoors will add additional color, and some will bloom earlier than the more showy Daffodils and Tulips. Very little effort need be expended in planting them either in the rock garden or the border.

Chionodoxa Lucillae "Glory of the Snow"—Bright blue flowers in pretty clusters of eight to ten. Plant in small groups about three inches deep. They will naturalize readily if left undisturbed. Doz. **35c**; 100 **$2.75**

Scilla Nutans

Eranthis Hyemalis "Winter Aconite"—Bright yellow, buttercup like flowers about three inches wide, blooming as early as the spring crocuses. Plant about two inches deep in the rock garden in clusters. Doz. **35c**; 100 **$2.75**

Fritillaria Imperialis "Crown Imperial"—Old favorite lily-like flowers. Good for border planting. Each **60c**; Doz. **$6.00**

Ixias—Assorted colors. A fine mixture of these bright, long stemmed flowers. These are best suited for greenhouse or conservatory culture as they are not hardy in this section. Doz. **35c**; 100 **$2.50**

Muscari, Heavenly Blue "Grape Hyacinth"—This is by far the best of the several types of Muscari. Planted in the border in clusters or rock garden, and left undisturbed they will re-seed themselves nicely. (See illustration). Strong bulbs. Doz. **40c**; 100 **$3.00**

Oxalis, Buttercup—The large yellow flowered variety of this old favorite, suited for indoor and conservatory culture only. Each **5c**; Doz. **50c**

Oxalis, Duchess—The best pink flowered variety. Doz. **40c**

Scilla Nutans—The true "English Blue Bell". These are effective for planting with the late flowering tulips, particularly the yellow flowered. Plant bulbs about four inches deep and mulch well with leaves or manure. (See illustration). Doz. **40c**; 100 **$3.00**

Scilla Sibirica, "Blue Squills"—Bright blue bell like flowers, free and early blooming. Planted under trees, in the border or rock garden they succeed very well. Plant about three inches deep and mulch well with rotted manure or leaves. Doz. **35c**; 100 **$2.75**

"Snowdrops", Galanthus Elwessi—These are the very first flowers of the spring. Plant along the walk, in the border or the rock garden. If left undisturbed they will naturalize freely. Doz. **35c**; 100 **$2.75**

CALLA LILIES

Aethiopica—The largest flowering white variety. Extra large roots, dormant. Each **35c**; Doz. **$3.50.**

Little Gem—A smaller variety, but blooms very freely. Strong roots, dormant. Each **30c**; Doz. **$3.00.**

Elliottiana (The Golden Yellow Calla)—Strong dormant roots. Each **50c**; Doz. **$5.00.**

LILIES

FALL planting of lilies, with the exception of a very few kinds has proved disappointing to many in our locality. This is the reason for not offering a larger list. Lilies require early transplanting in order to make root growth before cold weather comes, and except for the "Madonna" and a very few others the bulbs do not ripen early enough, and are not available in time to plant sufficiently early for satisfactory results. For this reason we advise early spring planting for most lilies.

Planting—Dig the hole or bed ten to twelve inches deep, fill in two to four inches of broken crock, brick or porous rock and over this fill in some coarse sand. Place the bulb on top of this so as to leave the top of the bulb six to seven inches below the ground level. Fill in and firm with good garden soil.

Lilium Candidum, "The Madonna Lily"—This beautiful white lily is a great garden favorite. To get best results plant early in order that they may make a root growth before the ground freezes. We have a wonderful lot of bulbs this season and offer them in three sizes, and at a lower price than previously. Our bulbs are American grown by a specialist and we consider them superior and much more desirable than the imported.
Large bulbs **Each 25c**; Doz. **$2.50**; 100 **$20.00.** Very large bulbs Each **35c**; Doz. **$3.50**; 100 **$25.00.** Monster "Jumbo" bulbs Each **50c**; Doz. **$5.00.**

Lilium Speciosum Magnificum—This is an improved type of the Japanese pink lily, more robust and hardier. We will have some good sized American grown bulbs about October 1st. We supplied some of these bulbs to our customers last fall with most satisfactory results. Each **45c**; Doz. **$4.50**

Lilium Harrisi—The Bermuda Easter Lily. Early flowering. Largest bulbs Each **30c**; Doz. **$3.00.**

Lilium Giganteum—The Japanese Easter Lily. This is the best lily for Easter. Largest bulbs Each **35c**; Doz. **$3.50.**

Indoor culture of Lilies—The principal requirement of Lilies is proper drainage. In potting them be sure to provide enough of this so that at no time will the plant get water logged. Any good garden soil may be used, and after the bulb is planted set away in a cool place. As soon as a number of roots show through, it may then be brought into the light. A cool place at first is best, after growth has started well the temperature may be increased.

Gorgeous Peonies

"The Flower of the Great Northwest"

THE Peony has the largest and most gorgeous flowers of all perennials. Peonies grow easily, bloom profusely and are the pride of every garden.

PLANTING—The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants. A light covering of straw, after the ground has frozen, is desirable.

QUALITY—Our Peony "roots" are substantial plants with 3 to 5 eyes. "Clumps" or older stock can be supplied at double the price of "roots."

The Peony is an unexcelled garden flower, hardy as an oak yet with the beauty and fragrance of a rose.

Bright Phlox

For Mid-Summer Flowers

PHLOXES are very hardy floriferous perennials that give bold, brilliant color effects from July to frost.

Where to Plant—They are exceedingly attractive when planted in masses of a single kind in a bed or border. Their midsummer bloom makes them a most valuable addition to beds where such spring-blooming plants as Iris, Peonies, Poppies, Etc., are located.

Planting—Space the plants 15 to 18 inches apart and set the roots about 2 inches below the ground surface, making sure that the new eyes are well covered. **After freezing weather cover these new plantings with a light mulch of straw or hay.**

The Phlox Plants Give Large Colorful Flowers from Mid-Summer to Fall.

F. G. Von Lassburg—Purest white; individual flowers very large. Tall, mid-season.

Miss Lingard—The most popular white. Immense heads of white flowers in late June and again in September.

Mrs. Jenkins—Immense trusses of pure white flowers. Early.

LAVENDER AND PURPLE PHLOX

Eugene Danzanviller—Soft lavender shading lighter to center.

Champs Elysees—Large trusses of dark crimson-purple, medium height.

Mrs. Chas. Dorr—A beautiful shade of lavender. Very large conical heads.

PINK PHLOX

Enchantress—Bright salmon-pink with darker eye. A strong, healthy plant.

Elizabeth Campbell—Very large heads, with flowers of quite a new color—light salmon changing to pink in the center. **35c, 2-year 50c.**

Mme. Paul Dutrie—Opens a soft lilac-rose which gets lighter as it ages.

Pantheon—Deep salmon-rose; light center. Very large flower. Tall.

Rheinlander—A most beautiful salmon-pink with deeper center. Immense size.

Rijnstroom—A lovely rose pink, much like Paul Neyron rose. Very large flower heads.

Thor—A rich salmon pink with crimson eye. **35c, 2-year 50c.**

W. C. Egan—Soft shade of lilac with dark pink eye. General effect is a soft rose color.

A NEW EARLY PINK

Miss Verboom—Blooms in June with the Miss Lingard White Phlox and bears long heads of rose-pink with bright glossy-green foliage that is free from rust—**35c.**

WHITE WITH PINK EYE

Bridesmaid—Tall, with flowers of pure white, with large crimson-carmine eye.

DWARF PHLOX FOR BORDERS
